

Model No. WB-8-6 Grille

Steel ceiling grille for use with a 6.5" driver features a clean contoured edge and an economical cost making it a popular choice for offices, schools, medical facilities and commercial applications of all kinds.

Features

- Precision formed from single piece of 22-gauge steel with a perforated center and beveled edge.
- White powder epoxy finish
- 8-32 x 1" welded studs with palnuts for concealed mounting of an E.I.A. 6.5" speaker.
- Four white 8-32 x 1-1/2" Phillips-head screws for attaching a speaker/grille assembly to a backbox or mounting ring (order separately).
- Features the same diameter as Lowell's 8" grille Model WB-8, which allows it to mount to the same backboxes. This allows the contractor to standardize on one backbox while using 8" and 6.5" speakers in different areas of a project.

A & E Specifications

The grille for use with a 6.5" driver shall be Lowell Model WB-8-6. It shall be one-piece 22-gauge steel reinforced with a peripheral flange of 60 degrees. The diameter shall be 12.875" with a shallow mounting projection of 0.25". Model WB-8-6 shall include welded studs for mounting specified 6.5" speaker. It shall feature four 0.25" holes spaced at 90 degree intervals on a 11.25" bolt circle for mounting the specified backbox or mounting ring. The grille shall be finished in white powder epoxy and include four white 8-32 x 1-1/2" Philips-head screws for backbox mounting.

Heard Everywhere Since 1947
