

Potentiometer control with 50 ohm impedance provides economical volume level adjustment in systems with low power circuits.

### FEATURES:

- 50 ohm impedance
- 5W audio power rating
- For use with 4, 8, or 16 ohm voice coil circuits
- Continuous attenuation with stops at minimum and maximum
- Includes:
  - Adhesive dial scale (for rackmount use)
  - Black knob

### A&E SPECIFICATIONS:

The potentiometer control with 50 ohm impedance shall be Lowell model LV-50S-RM. It shall feature continuous attenuation with stops at minimum and maximum. It shall include a black knob and an adhesive dial scale (0-10) for rackmount use.

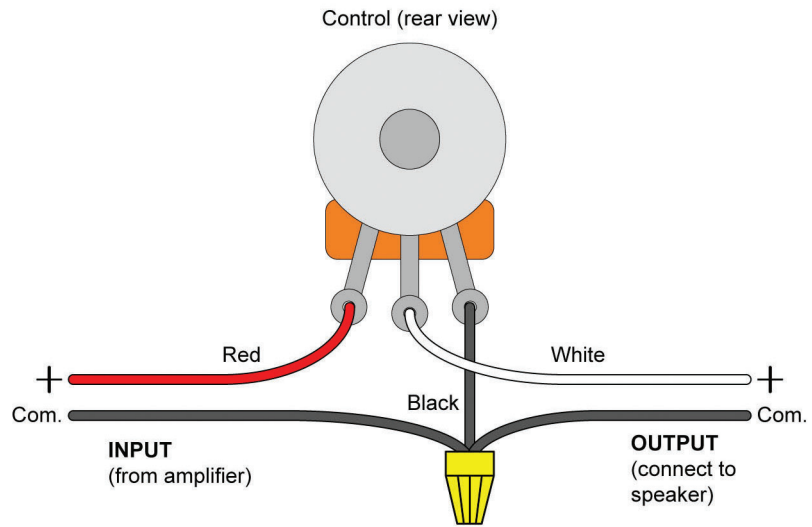

### Lowell LV-50S Potentiometer Series Overview
